

## KEY INFORMATION DOCUMENT (KID) – Futures CFDs

### Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

CFD's are offered by Exclusive Change Capital Ltd (the "Company", "we" or "us"), registered in the Republic of Cyprus, with registration number HE 337858. The Company is authorised and regulated by the Cyprus Securities and Exchange Commission in the Republic of Cyprus, with license number 330/17. For further information please go to <https://exclusivecapital.com>

This document was last updated on the 24<sup>th</sup> of March 2020.

You are about to purchase a product that is not simple and may be difficult to understand.

### What is this product?

#### Type

A contract for difference ("CFD") is a leveraged contract entered into with the Company on a bilateral basis, whose value is determined based on the value of an underlying asset, settled in cash only and the investor has no right whatsoever on the actual underlying asset. It allows an investor to speculate on rising or falling prices on an underlying Future. An investor has the choice to buy (or go "long") the CFD to benefit from rising Future prices; or to sell (or go "short") the CFD to benefit from falling Future prices. The price of the CFD on a Future is derived from the price of the underlying Future, which may be either an equity, commodity or an index.

CFDs are leveraged products and leverage may be increased (equivalently, margin requirement may be decreased) at the investor's request, subject to fulfilment of certain criteria. Furthermore, leverage may be reduced (margin requirement increased) at the Company's discretion in cases of extreme market volatility. At the end of each trading day, any open positions are rolled over and charged a daily swap fee. Please note that margin trading required extra caution, because whilst you can realize large profits if the price moves in your favour, you risk extensive losses if the price moves against you. Failure to deposit additional funds in order to meet the maintenance margin requirement as a result of a negative price movement may result in the CFD positions being auto-closed. This will occur when your remaining account equity falls below the maintenance margin requirement.

The CFD on Futures track the current front month and are automatically rollover by the Liquidity provider prior to expiry to the next available month. As a result, there is no recommended holding period for CFD's and it is down to the discretion of each individual investor to determine the most appropriate holding period based on their own individual trading strategy and objectives. The company retains the ability to unilaterally terminate any CFD contract where it deems that the terms of the contract have been breached.

### Objectives

The objective of the CFD is to allow an investor to gain leveraged exposure to the movement in the value of the underlying Future (whether up or down), without actually needing to buy or sell the underlying. The exposure is leveraged since the CFD only requires a small proportion of the notional value of the contract to be put down upfront as initial margin and is one of the key features of trading CFDs. In the case of CFD on an Index Futures, the prices are based on the underlying prices of the Indices futures trading on major exchanges and execution venues. Prices of this specific investment product may be obtained either by liquidity providers who obtain such prices from the relevant exchanges or directly from the relevant exchanges. For specific trading timetable please check the following website <https://www.exclusivecapital.com/trading/instruments/>

In order to purchase a major equity Index Future CFD, the retail investor must have sufficient margin in his account. Suppose as an example that the margin requirement on a specific Index Future CFD is 5.00%. This means that in order to open a transaction of €10,000 (deal size), the investor will need to have a minimum margin of €500 in his account. This represents a leverage of 1:20.

Note that Leverage and Margin Requirement are directly related as follows:  $\text{Leverage} = 1 / \text{Margin Requirement}$ , or in reverse  $\text{Margin Requirement} = 1 / \text{Leverage}$ .

The profit or loss is determined according to the following formula:

For Buy (Long) positions:  $\text{Deal size (in units of base asset)} \times [\text{Close Bid} - \text{Open Ask}] = \text{P/L (in units of the profit currency)}$

For Sell (Short) positions:  $\text{Deal size (in units of base asset)} \times [\text{Open Bid} - \text{Close Ask}] = \text{P/L (in units of the profit currency)}$

The P/L from the closed positions is then converted into the base currency of the investor's account, if different. This is done on the basis of the relevant Bid/Ask rate of the two currencies at the time the position is closed.

The P/L is also affected by the fees charged by Exclusive Change Capital Ltd, as detailed below further in this document.

### Intended Retail Investor

CFDs are intended for investors who have knowledge of, or are experienced with, leveraged products and understand how the prices of CFDs are derived, the key concepts of margin and leverage, the fact that losses may exceed deposits and have the appropriate financial means to bear and sustain losses of the entire amount invested.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product

will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

This risk indicator assumes that you may not be able to buy or sell your CFD at the price you wanted due to volatility of the market or you may have to buy or sell your CFD at a price that significantly impacts the return on your investment. CFDs may be affected by slippage due to increased volatility and/or low liquidity in the underlying market. CFDs are leveraged OTC products and cannot be sold on any exchange, MTFs or other trading venue, and due to underlying market movements, they can generate losses rapidly. There is no capital protection against market risk, credit risk or liquidity risk.

CFDs on futures may fluctuate significantly in a short period of time. If the change in price is against the direction chosen by the investor, then the investor can experience significant losses over a short period of time. Retail Clients only are protected by "Negative Balance Protection", which means that the loss is restricted to the investor's account balance.

Be aware of currency risk. It is possible to buy or sell CFDs which are different to the base currency of your account. The final return you may get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Leveraged trading magnifies the losses of price movements and failure to deposit additional funds may result in the CFD being auto-closed. You are also subject to risks relating to internet failures, communication failures and delays, or account password theft.

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are theoretical eventualities of future performance and are not an exact indicator. What you get will vary depending on how the market performs and how long you hold the CFD. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you; the stress scenario also doesn't take into account overnight financing effects.

The figures shown include all the costs of the product itself. If you have been sold this product by someone else, or have a third party advising you about this product,

these figures do not include any cost that you pay to them. The figures do not take into account your personal tax situation, which may also affect how much you get

back.

Below are examples of performance scenario of a deal in a CFD based on Japan 225 Future, assuming current balance of a retail client is 500 EUR.

Margin Amount in EUR	Leverage	Deal Amount in units of base asset	Japan225 Opening Deal Price	Deal Amount in JPY	Deal Direction	Change in Price	Japan225 Closing Deal Price	P/L Amount in JPY	P/L Exchange Rate to EUR	P/L Amount in EUR under Negative Balance Protection
494.69	20:1	60	22096	1,325,760	Buy	5%	23200.8	66288	134	494.69

### Risk Warning

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

### What happens if Exclusive Change Capital Ltd is unable to pay out?

In the event that the Company becomes insolvent and is unable to meet its financial obligations to you, investors may lose the value of their investment. However, we segregate all retail client funds from our money in accordance with our regulatory

requirements. In case of insolvency, retail clients may be eligible to compensation of up to €20,000 by the Investor Compensation Fund set up by the Cyprus Securities and Exchange Commission.

#### What are the costs?

Before you begin to trade CFD's you should familiarize yourself with all one-off and ongoing costs for which you will be liable. These charges will reduce any net profit or increase your losses. The charges per each underlying asset are detailed on our [website](#), as well as visible on the trading platform that investors use which will always take precedence over the website in case of price difference; each investor may have different charges on all or some of the underlying assets based on the investor's history, volume, activities, client categorization and/or services provided.

One-Off Costs	Spread	All our Platforms	The difference between the buy price and the sell price is called the spread. This cost is realized each time you open and close a trade. For the purpose of the example we will assume a transaction of 60 units in Japan 225 with 0.50 spread. $60 \times 0.50 = 30$ JPY as the instrument is priced in JPY. The amount of 30 JPY will be deducted from the P/L upon opening the transaction and therefore immediately after opening the transaction the P/L of that transaction will be -30 JPY. This reflects in real-time the bid/ask spread cost that would be incurred to the investor if he/she were to close out the position at that moment.
	Commission	All our Platforms	This is a commission charged when you buy and sell a CFD based on the notional value of the trade.
	Currency Conversion	All our Platforms	Any cash, realized profit and losses, adjustments, fees and charges that are denominated in a currency other than the base currency of your account, will be converted to the base currency of your account and a currency conversion fee will be charged to your account.
	Dividends	All our Platforms	In the event of a distribution of cash dividends in relation to an Index CFD, a dividend adjustment will be made to the investor's balance with respect to the underlying Index's positions held by the investor at the end of business day which precedes the ex-dividend date. The dividend adjustment shall be calculated based on the size of the dividend, the size of the investor's position and whether it is a buy or a sell transaction, whereby in long positions the adjustment shall be credited to the investor's balance and in short positions the adjustment shall be debited from the investor's balance.
Ongoing Costs	Financing Costs	All our Platforms	The Company charges Overnight Financing (OF) for deals that remain open after the end of the daily trading session. Depending on the position held (e.g. long or short) and our prevailing interest rates, your account may be credited or debited with the financing cost. If the calculated OF Percentage is positive, it means that an applicable amount will be added (credited) to the investor's account. A negative OF Percentage means that an applicable amount will be subtracted (debited) from the investor's account. If the CFD's quoted currency differs from the account's currency, it will be converted to the account's currency at the prevailing exchange rates. Swaps can be viewed on the trading platform and the Company's website.
	Rollover Costs	All our Platforms	The company charges Rollover costs when the particular contract is due to expiry. There will be a cash adjustment applied to client's account if client holds a position at the expiration date. Note that the liquidity provider will roll to the next available month at its own discretion and is informing us prior to that change.

#### How long should I hold it and can I take money out early?

CFDs are intended for short term trading, in some cases held for less than 24 hours, and are generally not suitable for long-term investments due to the leveraged nature of these instruments. There is no recommended holding period and no cancellation period. You can open and close a CFD position at any time during the market trading hours of each CFD, but it may not be at a price beneficial to you or your investment goals.

#### How can I complain?

If you wish to make a complaint you should download the "Complaints Procedure for Client" form and contact our Team by emailing [complaints@exclusivecapital.com](mailto:complaints@exclusivecapital.com) in writing to the Company indicating your name, account number and nature of the complaint. If you do not feel that your complaint has been resolved satisfactorily, you may refer your complaint to the Financial Ombudsman of the Republic of Cyprus.

Further information about the procedures for communicating with the Financial Ombudsman, can be found at [www.financialombudsman.gov.cy](http://www.financialombudsman.gov.cy)

#### Other relevant information

If there is a time lag between the time you place your order and the moment it is executed, your order may not be executed at the price you expected. The Trading Terms & Conditions as well as all related Policies and other Disclosure Documents of our website contains important information regarding your account. You should ensure that you are familiar with all the terms and policies that apply to your account. This key information document does not contain all information relating to the product. For other information about the product and the legally binding terms and conditions of the product, please refer to the Company's website at <https://exclusivecapital.com/resources/legal-documents/>
